

Dear Parents/Carers

HEADLICE are becoming a regular problem in all schools and despite the efforts to eradicate this problem it still keeps reoccurring.

It only takes one parent to neglect treating an infected child to undermine the work of every other parent so be sure to check your child's hair with a tooth comb at least once a week and carry out the appropriate treatment to clear the head lice and nits.

If you are unsure of how to treat head lice and would like some advice, **please pop into the school office for an information leaflet** with advice from the NHS.

This problem can only be cleared up with **EVERYONE'S** help.
